### Abstract

1-*R*-2,2-dichlorocyclopropyl hydrazines have been synthesized by alkylation of hydrazine 1-*R*-1-halo-methyl-2,2-dichlorocyclopropanes which react with acetoacetic ester and acetyl acetone to giving 1-(1-*R*-2,2-dichlorocyclopropylmethyl)-3-methylpyrazol-5-ones and 1-(1-methyl-2,2-dichlorocyclopropylmethyl)-3,5-dimethylpyrazole.
